

Adverse Childhood Experience (ACE)

***70% of adults** in the U.S. have experienced some type of traumatic event at least once in their lives. That's 223.4 million people!*

What is an ACE Score & Why Does it Matter?

The Adverse Childhood Experience questionnaire is based off an original study by the CDC and Kaiser Permanente with 17,000 subjects published in 1998. After two decades of continued research this assessment is still the primary tool in understanding the impact of early childhood trauma.

The Staggering Effects of Unhealed TRAUMA

Men with six or more ACEs were 46 times more likely to have injected drugs than men with no history of adverse childhood experiences

46x

Approximately 5 million children are exposed to domestic violence every year. Children exposed are more likely to attempt suicide, abuse drugs and alcohol, run away from home, engage in teenage prostitution, and commit sexual assault crimes.

5M

70%

An estimated 70 percent of adults in the United States have experienced a traumatic event at least once in their lives and up to 20 percent of these people go on to develop posttraumatic stress disorder, or PTSD.

90%

90 percent of clients in public behavioral health care settings have experienced trauma.

Questionnaire Finding your ACE Score ra hbr 10 24 06

While you were growing up, during your first 18 years of life:

1. Did a parent or other adult in the household often ...

Swear at you, insult you, put you down, or humiliate you?

or

Act in a way that made you afraid that you might be physically hurt?

Yes No

If yes enter 1 _____

2. Did a parent or other adult in the household

often ... Push, grab, slap, or throw something at you?

or

Ever hit you so hard that you had marks or were injured?

Yes No

If yes enter 1 _____
